Access to the Austria Center Vienna:

Please use the Entrance „Main Entrance - Delegates and Media“:

Security check

Due to the Austrian Presidency of the Council of the European Union security regulations are very high. Once you enter the Austria Centre Vienna, you will need to pass a security check similar to security checks at the airport. Your hand luggage and all items carried will be put through an X-ray control. Electronic devices, such as laptops and tablets, must be removed from your hand luggage before the control and will be screened separately. Prohibited articles and/or dangerous goods will be removed, packed in a safe bag, safely stored until the end of the conference and returned when leaving the locality. It's not possible to bring water bottles into the conference venue. Every participant must pass through a metal detector while their luggage is being scanned. Please bring an identification document with you.

We kindly ask you to plan enough time for the security check.

We will welcome you after the Security check with your name badge.

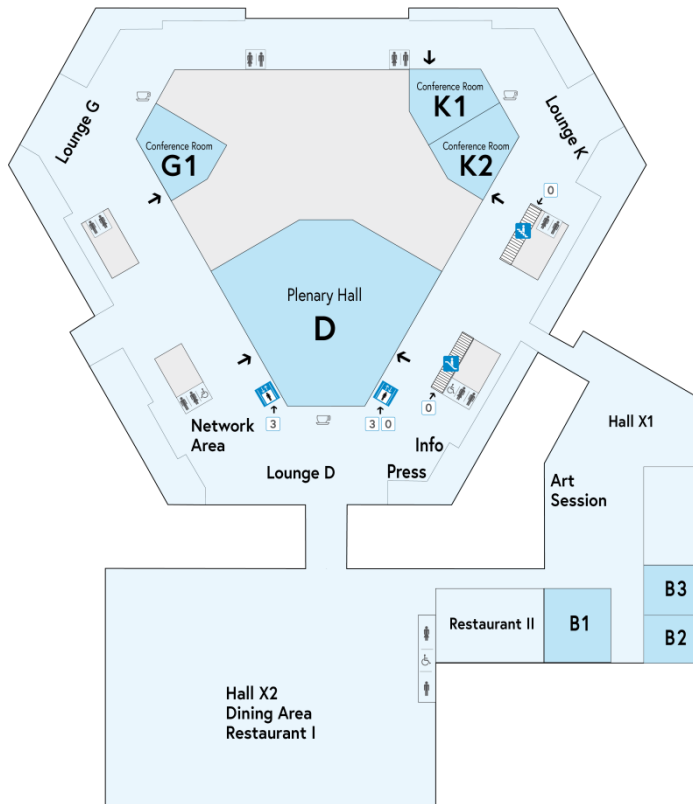

PLANS
